PROFESSIONAL SUMMARY

Versatile AI Engineer and Software Developer with hands-on expertise across the full AI product lifecycle — from fine-tuning deep learning models and building RAG pipelines to deploying production-grade agentic systems with MCP servers. Experienced in shipping AI-driven products at Tagshelf (computer vision, NLP, intelligent automation), educating AI practitioners and coaching professionals on AI adoption at Alterna Academy, and applying AI/ML to IT operations at WELEEC. Proficient in leveraging AI as a force-multiplier in software development workflows using LLM-assisted coding, prompt engineering, and AI pair-programming tools.

EXPERIENCE

IT Administrator & Robotics Teacher · WELEEC *Jul 2026 – Present*

Nagua, DO

- Manage IT infrastructure, systems, and network administration for the organization.
- Teach robotics fundamentals through a hands-on STEM curriculum for students.
- Identify and implement opportunities to integrate AI/ML into core business processes.

IT Administration · Network Administration · Robotics Education · AI/ML Integration

Alterna Academy *Sep 2025 – Present*

Santo Domingo, DO (Remote/Hybrid)

Builder Coach *May 2026 – Present*

- Coach working professionals on integrating AI into daily workflows: LLM mechanics, tokenomics, advanced prompting, and agentic skills.
- Guide participants through hands-on tool use across Claude Desktop/Code, Codex, Antigravity, and NotebookLM, including MCP-based integrations.

AI Coaching · LLMs · Agentic Workflows · MCP · Prompt Engineering

AI Instructor *Sep 2025 – May 2026*

- Designed and delivered a comprehensive AI curriculum: supervised/unsupervised learning, reinforcement learning, deep learning architectures, and LLM fundamentals.
- Taught hands-on modules on building AI agents, prompt engineering, agentic workflows, MCP integrations, and the Anthropic AI SDK.
- Guided students in building end-to-end ML projects: data preprocessing, model training with PyTorch & scikit-learn, evaluation, and deployment to cloud (Azure ML).
- Mentored students on emerging topics: RAG pipelines, vector databases, agentic AI patterns, and modular AI system design.

Teaching · LLMs · AI Agents · PyTorch · RAG · Hugging Face · Azure ML · MCP

AI / Software Engineer · Tagshelf *Nov 2024 – Jul 2026*

Santo Domingo, DO (Hybrid)

- Architected and maintained Alfred, a production AI platform combining Computer Vision, NLP, and intelligent document processing, serving enterprise clients at scale.
- Designed and implemented multi-step AI agent pipelines — orchestrating LLM reasoning, tool use, and retrieval-augmented generation (RAG) to automate complex business workflows.
- Built and exposed MCP (Model Context Protocol) servers, enabling seamless integration of internal tools with LLM-based agents.

• Implemented scalable backend services with ASP.NET, FastAPI, and Express; deployed and monitored workloads on Azure and GCP.

AI Agents · RAG · MCP Servers · Fine-tuning · Computer Vision · NLP · Azure · GCP · ASP.NET · FastAPI

Software Developer · Oriontek *Apr 2024 – Jul 2024*

Santo Domingo, DO

• Developed and deployed full-stack web applications using React and ASP.NET Core; managed cloud infrastructure on Azure.

• Collaborated on frontend integration with backend APIs, improving overall system performance and user experience.

React · ASP.NET Core · Azure

TECHNICAL SKILLS

AI / ML: AI Agents, RAG Pipelines, MCP Servers, LLM Fine-tuning, Prompt Engineering, Computer Vision, NLP, Deep Learning, Reinforcement Learning

Frameworks: PyTorch, scikit-learn, Hugging Face, LangChain, Anthropic SDK, FastAPI, Flask, ASP.NET Core, NestJS, Express

Cloud & MLOps: Azure Machine Learning, Docker, GitHub Actions, Model deployment & monitoring

Frontend: React, Next.js, TypeScript, JavaScript, React Native, Flutter

Databases: PostgreSQL, SQL Server, Oracle, MongoDB

Dev Tools: GitHub Copilot, Claude (Desktop, Code, CLI), Cursor, Codex, Antigravity, Git, Linux, Colab

EDUCATION

B.Sc. Software Engineering · Universidad Abierta Para Adultos (UAPA) *2021 – Present*

Full SDLC, software architecture, algorithms, and engineering best practices.

Artificial Intelligence Specialization · Talento Digital *Nov 2025 – Jan 2026*

ML model development from scratch, deep learning math, Azure ML, PyTorch, scikit-learn, Colab.

Full-Stack Development Bootcamp · Alterna Academy *Feb 2024 – Jun 2024*

React, React Native, ASP.NET, cloud computing, Docker, git, Linux.

CERTIFICATIONS

Artificial Intelligence, Junior Fullstack Developer, Practical Algorithmic Trading, EF SET English Certificate: 65/100 (C1 Advanced)

LANGUAGES

Spanish: Native · **English:** Full Professional Proficiency (C1) — EF SET Certificate: 65/100
